

# HoLEP International Workshop | Novel

**Start Date: 12/14/2018**

**End Date: 12/15/2018**

HoLEP International Workshop - Novel Laser Techniques in BPH

December 14-15 | Paris Saint-Joseph Hospital

The efficiency and safety profile of the Holmium laser has made this tool a versatile multi-purpose instrument for use in the endoscopic treatment of a wide variety of urologic disorders, in particular, benign prostatic hyperplasia.

2-day course, intended for specialist surgeons in Urology, Oncology, MMG, Nurses and Medical Technicians of Medical Radiology.

These interactive educational days will include:

Lectures

Tips & Tricks

Live surgery cases

Hands-on skill session with recognized experts and mentors
